## 20099 JR PS SOFTSHELL VEST

A staple for any racer, the softshell vest provides both a comfortable midlayer, along with great podium wear to showcase their pride in team and success

SIZE: 128/8, 140/10, 152/12, 164/14, 174/16  
 FABRIC: 100% Polyester

COLORS: 999 Black

### Features

- Bonded fleece provides insulation and wind protection
- 2 zippered hand pockets and one chest pocket for easy, accessible storage
- Brushed tricot chin flap for added comfort
- Plenty of room on chest and back for embellishment

999

## 20070 JR PRONGHORN SOFTSHELL SHORTS 2.0

With updated fabric and fit, the Pronghorn Softshell short is a staple for racers to keep their quads and butts warm, during training runs or in the start house.

SIZE: 128/8, 140/10, 152/12, 164/14, 176/16 FABRIC: 100% Polyester

COLORS: 990 Black

### Features

- Bonded fleece provides insulation and wind protection
- Full side zip for quick and easy on or off
- Micro adjustment waist Velcro straps

990

## 29505 JR PINE RACE PUFFY JACKET

A full puffy jacket designed to keep the athletes and coaches warm training and skiing in the coldest of climates. A high loft Primaloft® insulation along with a durable outer fabric, ensures that the pros will stay plenty warm, even when it's stupid cold outside.

SIZE: 128/8, 134/9, 140/10, 152/12, 164/14 FABRIC: 100% Polyamide, Primaloft® insulation

COLORS: 412 Black/Grass Green, 519 Dark Blue/Red, 559 Amparo Blue/Red, 992 Black/Red

### Features

- Helly Tech® Performance
- Waterproof and breathable
- 2-layer fabric
- Primaloft® Gold insulation, 200g in the body, sleeves and hood, and 100g under arms/sides
- Fully seam sealed for ultimate waterproof protection
- Articulated elbows increase range of motion
- Helmet compatible and detachable hood
- Elastic hood sides
- PU coated/water resistant powder skirt with snap away feature
- Under arm vents provide mechanical venting
- Fleece-lined collar
- Interior goggle pocket for easy access and storage
- Ski pass pocket on lower left arm
- Zippered hand pockets

# COACHES

## 29327 MULE COACHES BIB PANT

Coaches are the unsung hero's of the race community as they burden themselves with both the mental and material weight of the athletes. At HH, we can't help with the psychology, but we can provide the coaches with the products to help them carry as much gear as possible. The Mule Coach bib pant combines both durability and utility.

SIZE: XS-XXL

FABRIC: 100% Polyamide; Reinforcement in 100% Cordura® fabric

COLORS: 990 Black

### Features

- Helly Tech® Professional
- Waterproof and breathable
- 2-layer fabric
- Primaloft® Black insulation 60g
- Fully seam sealed for ultimate waterproof protection
- Reinforced panels in high abrasion areas such as hem, seat and knee
- Elastic waistband with Velcro tabs provide micro adjustability and belt loops
- Full length side zips with snaps for both venting and easy on/off
- Additional inside leg vents
- Bib construction with stretch panels for comfort and added protection from the elements
- zip off chest radio pocket
- Front zipper features storm flap for increased weather protection
- PU coated/water repellent gaiters with gripper elastic ensures a weather resistant seal
- Fleece lined, zippered hip pockets provide secure storage
- mid thigh utility pockets to keep rules books and race reports
- Interior knee pockets for knee pads

990

## 29881 MIDSTATION FZ MT PANT

Full side zip pant that can fit over a pair of cotton work pants or look great on their own. A non bib lighter weight version of the Mule bib.

SIZE: 2XS-4XL

FABRIC: 100% Polyamide; Reinforcement in Cordura® fabric

COLORS: 990 Black, 991 Black no reflex

### Features

- Full 360 degree Reflectivity at lower leg 3M EN471 approved
- Internally reinforced thigh utility pocket due to tools with D-rings
- Cut to similar length and width of workwear pants
- High waterproofness
- High abrasion resistance with reinforced knees and hem
- Internal knee pad pocket
- Suspender compatible
- Adjustable Waist
- Hand warmer pockets
- Boot gaiters
- Embellishment Zippers inside for easy applying logos

990

990 Back

## 29349 CEDAR UTILITY VEST

new concept for coaches, we present our time tested and often loved utility vest. A deep collar helps to ensure that this wearable tool kit is easily worn over any coat or midlayer. Seven front pockets, two large internal pockets and one back pocket, ensuring lots of storage space for the coaches and all the extras they need to carry

SIZE: XXS-XXL

FABRIC: 100% Polyamide

COLORS: 160 True Red, 225 Tangerine, 990 Black

### Features

- Helly Tech® Performance
- Waterproof and breathable fabrication
- radio harness fits most radios
- Utility webbing throughout
- zippered bellowed pockets provide sample storage
- Velcro nametag with pinholes

# ACCESSORIES

## 29882 START HYTTE 140L BAG

The start house is organized chaos and the Start Hytte bag helps to maintain some order for both coaches and athletes. 140L provides ample space for coaches to stuff jackets, warmup pants and other non essential race gear.

SIZE: STD FABRIC: 100% Polyester  
 COLORS: 990 Black

### Features

- Waterproof fabric
- Stowable double carry straps
- Internal extendible spindrift collar to increase volume
- outside easy-access pockets

990

## 20047 SKI BOOT - HELMET BAG

Developed together with the ski team athletes, this bag is designed to contain the technical gear of the athlete in the exact manner it is optimally stored. Easily transported as a supported backpack.

SIZE: STD FABRIC: 100% Polyester  
 COLORS: 990 Black

### Features

- One main compartment to fit boots, liners, helmet, gloves and goggles, shin guards, backplate and other protection, jacket and even some other clothes
- Outside, easy-access pockets

990

## 29926 HH COACH BAG

Developed together with the ski team coaches, this bag is designed to contain the gear of the coach in the exact manner it is optimally stored. Easily transported as a supported backpack.

SIZE: STD FABRIC: 100% Polyester  
 COLORS: 990 Black

### Features

- One large main compartment. Inside mesh pocket for camera etc.
- separate zippered inside drill bit compartment
- Separate compartment for iPad/tablet
- Outside easy access zippered pockets
- External webbing
- Detachable top lid.

HELLY HANSEN  
**TECH CLINIC**

WARM. DRY. COMFORTABLE.

Launched in the early 1970s, Lifa® is based on a yarn technology that has been tested and developed over the years. The key functions of Lifa® deliver both moisture management and insulation, moving moisture away from the skin, while transporting perspiration to the surface of the fabric, where it evaporates. In 2006 Lifa® was combined with non mulsed Merino wool to create the best performing base layer to date.

Lifa® is a hydrophobic fiber that prohibits the absorption of liquid. The Lifa® fibers are used on the first membrane layer of base layer garments, the layer nearest to the skin. When the first yarn layer is combined with an additional layer with hydrophilic (moisture absorbing) properties, the sweat from the body is moved away from the skin and transported to the second layer, where it is absorbed. This enables the consumer to stay warm, dry and comfortable.

### HOW LIFA® WORKS

LIFA® stay dry technology moves sweat away from your skin, keeping you warmer for longer

LIFA® is an ultra-light weight base layer fabric that works perfectly in the autumn and winter. HH LIFA® delivers light insulation and moisture management through its 100% single layer Lifa® fibers.

The Lifa® technology works best when layered under another garment, as the more garments you wear, the further the sweat and moisture will be transported out of the fabric and away from your skin.

LIFA® ACTIVE is our best moisture management base layer that is great for light insulation all year round.

Made from a light-weight, two layer fabric that is excellent in moving moisture away from the skin; it enables the user to feel warm and comfortable.

LIFA® ACTIVE can be worn as a single layer or can be layered under another garment.

LIFA® MERINO is a unique 2-in1 base layer that combines light-weight Lifa® fibers next to skin and an extremely soft Merino Wool exterior. The Lifa® fabric moves moisture away

from skin while the merino wool exterior is excellent at insulating and maintaining warmth. This is our warmest baselayer and is recommended for any type of outdoor activities in the winter.

### HH MERINO

Helly Hansen launched pure merino wool base layers a few years ago, delivering great all-day warmth and comfort for cold autumn and winter days

HH MERINO LIGHT and MID uses high quality, comfortable Merino Wool to deliver great warmth and comfort for colder days.

This is our recommended and preferred base layer for daily activities with low intensity in the winter. HH Merino Light is our year-round pure merino wool product. HH Merino Light is made with a light weight merino fabric, and it delivers light weight insulation, breathability and great comfort, all day, all year. HH Merino Mid is our mid-weight, 200g merino wool baselayer that is ideal for colder days.

# HELLY TECH®

**WATERPROOF. BREATHABLE. GUARANTEED.**

Helly Tech® is constructed with Polymer Polyurethane (PU ) based membranes and coating technologies. The PU membrane gives softness and stretch to the fabric, while the coating allows waterproofness and breathable qualities.

Helly Tech® is made either with Hydrophilic barrier membranes or Micro-porous membranes, depending on the end-use purpose of the fabric.

The Hydrophilic barrier works on an osmotic principle, keeping salts from entering and blocking the pores. The Micro-porous PU membranes are hydrophobic- “water hating” polymers. This membrane construction is responsible for the waterproofness of Helly Tech®, making the pores up to 20.000 times smaller than water droplets, while allowing breathability since the pores are up to 700 times larger than a water vapor molecule, allowing the evaporation of sweat and heat.

Helly Tech® is actually more than just a fabric – it is a combination of a DWR-treated outer fabric, a highly breathable and waterproof membrane, fully sealed seams and often a highly breathable inner fabric, mesh or lining.

The seams of the products are taped over with a waterproof ribbon and glue, preventing any water from entering the small gaps between the stitches of the seams.

## HOW HELLY TECH® WORKS

1. DWR treated outer fabric is windproof and water-repellent
2. Waterproof and breathable membrane or coating
3. Highly breathable inner fabric, mesh or lining

THERE ARE NUMEROUS TYPES OF HELLY TECH® FABRICS. THE MAIN DIFFERENTIATOR IS THE NUMBER OF PLYS (OR LAYERS) THE FABRIC IS BUILT FROM.

### HELLY TECH® PROFESSIONAL

Extremely waterproof and breathable designs and constructions. For highly aerobic, extremely wet or unusually long-lasting activities in extremely harsh conditions.

### HELLY TECH® PERFORMANCE

Highly waterproof and extra breathable sport specific designs and constructions. For a wide range of high performance outdoor activities during highly challenging, changing and unpredictable weather conditions.

### HELLY TECH® PROTECTION

Fully waterproof, windproof and breathable fabrics and constructions. For all situations and weather conditions where protection from the elements is needed.

#### 3 PLYCONSTRUCTION

Outer fabric + membrane and inner fabric bonded together for lightweight, quick drying and durability.

#### 2,5 PLYCONSTRUCTION

Outer fabric + membrane or coating bonded together with protective print on the inside for extreme lightweight and packability

#### 2 PLYCONSTRUCTION

Outer fabric + membrane or coating bonded together for breathable waterproofness, protected by inside lining or mesh adding warmth and comfort

## CARE FOR YOUR HELLYTECH®

### WHY SHOULD YOU WASH YOUR HELLY TECH®?

It is important to wash your Helly Tech® garment. Washing your garments will remove contaminating substances such as oils, dirt, and salts from the surface and restore the surface tension of the fabric, keeping it clean and helping the membrane perform at its best.

It might not be that obvious when you should consider washing your garments, so here are a couple of signs to look for:

– If the water and/or rain droplets no longer bead off the surface of the jacket and start leaving a wet mark, the DWR (durable water repellency) might be worn off or deactivated.

– Another sign is that if the breathability does not seem to be on the same level as when you first bought your Helly Tech® garment. The membrane could be contaminated.

### HOW TO WASH YOUR HELLY TECH®?

Before washing your Helly Tech® garment:

– Make sure you zip up all zippers to avoid any surface damage.

– Wash your product with warm water as instructed on the care label in a commercial washing machine.

– Do not use fabric softener or other detergents that have softening agents, as it will reduce the fabric surface tension and will have a negative effect on the fabric performance.

– HH® advises to use a technical washing product and to follow the instructions given by that product.

– A second rinse cycle with water is preferred to remove any detergents that might be left behind on the surface. It is important to remove excess detergent, as it might affect the performance of the fabric.

– After washing, you can safely tumble dry your Helly Tech® garment in order to reactivate the DWR treatment. Please always follow the garment care label for drying instructions.

# HELLY HANSEN TECH PARTNERS

The world's best down alternative.

PrimaLoft® is a synthetic insulation technology, offering superior thermal properties with excellent water repellency. It is made up of ultra-fine fibers that form air pockets to trap heat inside. Additional feature of the ultra-fine fiber is super softness.

**ALLIED**

Advanced down technologies.

Natural goose down is considered to be the single best insulating material available, due to its lightweight, compressibility and heat retention. Allied Down supplies its customers with the finest quality down and feathers on the market.

Little parts, big difference.

High quality zippers for all purposes. YKK® is a Japanese company founded in 1934. Today, their products are sold globally and YKK® is reputed as the industry leader for quality and innovative zippers and closure.

---

The cornerstone of thermal insulating materials. We work extensively with Polartec®, a famous manufacturer of lightweight and warm fleece, which is known for performance, durability and aesthetics. Main benefits for using Polartec® are warmth without high additional weight, high breathability, packable and fast drying.

---

Elemental protection.

Dry, comfortable and lightweight construction. The benchmark for durable yet lightweight fabrics throughout the outdoor industry.

---

Recco® Technology makes you searchable for organized rescue in the event of an avalanche accident. The system requires no training and no batteries to function, meaning it is always “on” and ready. RECCO® reflectors do not prevent avalanches nor do they guarantee location or survival in the event of a burial.

## HH WARRANTY

- HH will warrant all Uniform products against manufacturer's defects.
- The HH warranty does not cover damage caused by misuse, improper care, normal wear and tear and the natural breakdown of materials over time. Ripped, torn, cut, burned, stained or abused products will not be covered under the HH warranty.
- HH also limits the warranty on stretch fabrics to 2 years for abrasion. Due to the current Global limitations on access to Perfluorinated compound (PFC) Durable Water Resistant (DWR) coatings, HH cannot warrant surface water saturation without the regular and documented in-season and post season, technical washing and re-application of DWR by reputable brands such as Nikwax.
- All warranty claims will be subject to HH approval.
